

Safe Food Depends on a Clean Kitchen

**Control bacteria and viruses in the PREP AREA.
Sanitize by applying a simple chlorine bleach solution:**

- 1. Wash** surface with hot, soapy water to clean.
- Thoroughly **Rinse** off soap.
- 3. Sanitize** with a chlorine bleach solution (~200 ppm).
- Always **Air Dry**.

Bleach solution should be made fresh for each shift because bleach breaks down over time.
